

Elderly Facility APP - Feature Framework

Designing APP's Main Features

Elderly Help App	
Main Features:	
A. Patient Health Dashboard	
A.1 Daily Check-Ins	
- Users can input how their day went by answering simple questions about their mood and what they felt that day.	
- Users can see their checkins in weekly and monthly charts.	
- This would help the user to monitor their wellbeing; see what triggers their anxiety and learn more on how to minimize stress.	
A.2 Patient History	
A.3 Pain Scale Monitoring	
A.4 Connect to Apple watch to provide quick vital signs	
B. Emergency button for quick response and alert	
- could be connected to hardware device like a sensor or cctv camera	
C. Calendar and Notifications	
- Daily Medication Notification	
- Scheduled Appointment	
D. Help elderly and their family to connect with health professionals and services (vice versa)	
- Customized reply options for quick and easy reply	
E. Provide food ordering and options to display	
- Show Menu	
- Request prompt	
F. UI Accessibility Options	
- Font size adjustments	
- Color Contrast	
-Favorite	
Sub Features:	
G. Health Services Provider Search Option	
- Show the places where elderly care are ended the most (dashboard)	
- Provide information facilities and health care services for elderly care on desired map	
I. Full-time / Part-time Job Opportunities	
H. Personalized AI Robo Chat Box for quick questions
