Feature Proposed

<p>Name: Jan Angeline Parayno</p> <p>Occupation: Digital Marketer / Photographer</p> <p>Age: 26-30</p>	<p>Different viewing modes of the app based on whoever is using it. Elderly viewing will make the text bigger, and will give a text to speech option.</p> <p>The health professional viewing mode is more user friendly for professionals to enter data of their elderly patients.</p>	<p>Have an event invite option on the messaging thread. Users can create an event where they can input the date, time, and place.</p> <p>Events can be sent and accepted by the other user.</p> <p>On the day of the event, both users will be reminded of the event.</p>	<p>Have daily check-ins. Users can input how their day went by answering simple questions about their mood and what they felt that day.</p> <p>Users can see their checkins in weekly and monthly charts.</p> <p>This would help the user to monitor their wellbeing; see what triggers their anxiety and learn more on how to minimize stress.</p>
<p>Name: Jhaycea Parayno</p> <p>Occupation: Architect</p> <p>Age: 35-40</p>	<p>Connected to a smartwatch that periodically monitors heart rate, sleeping patterns etc. emergency call button</p>	<p>Messages only appear while thumb or finger is connected to a fingerprint sensor</p>	<p>Provide an image and breathing exercise pattern while the user is having an anxiety attack</p> <p>Provide an alert for family members/friends that is installed whenever the user is undergoing such episodes, this can be a</p>
<p>Name: Josel Parayno</p> <p>Occupation: Web Developer</p> <p>Age: 31-35</p>	<p>Personal Medication Alert system</p>	<p>Provide a group version for message interactivity</p>
